EMPLOYMENT HISTORY:

Production Lead - Apple (via MindSource Inc.) — 2015-2017 | (via Hogarth CA) — 2017-2023

- Collaborated closely with 5+ cross-functional teams - Business, Brand, UI/UX, Graphical Production, Design, Dev, QA and Release Operations - to deliver platform initiatives on schedule
- Managed product backlogs of 8000+ issues, feature requests and enhancements across 6+ product domains, ensuring Agile sprint cadence and continuous improvements
- Led triages for change requests, assessed scope, effort and risk to support sprint planning and release decisions in coordination with functional and product leads
- Led defect management across multiple releases, tracking issues through resolution in line with quality benchmarks and release timelines
- Designed and executed test strategies with 30+ metrics ensuring product quality, accessibility compliance and stakeholder approval
- Led communications, created and maintained clear and actionable documentation to support 150+ internal stakeholders per program cycle
- Managed and mentored a rotating production team members (8+ per sprint, 50+ overall)

Sr. Engineering Analyst - Apple (via MindSource Inc.) — 2014-2015

- Conducted system and regression testing across multiple platforms to validate and support acceptance criteria for functional integrity and release readiness, and post-release warranty support
- Provided data-driven insights and recommendations to optimize functionality, performance, analytics, accessibility, multimedia integration and overall user experience

IT Applications Programmer - Progressive Insurance Inc. — 2010-2013

- Collaborated on the design and development of a device enabling customized, usage-based insurance quotes, improving customer personalization and risk assessment
- Developed and implemented enhancements for high-traffic, time-sensitive policy rollouts, contributing to system stability and seamless user experience during peak demand
- Participated in technical discussions with business stakeholders to clarify feature requirements and support implementation planning
- Worked closely with QA and product teams to establish testing protocols and validate feature functionality prior to production deployment
- Created and maintained technical documentation to support knowledge sharing and cross-team collaboration

Software Engineer - EDS, Pune, India — 2006-2007

- Developed, enhanced and maintained dashboard applications supporting DaimlerChrysler's engineering and management teams, improving user training and data accessibility
- Provided support and continuous feedback, actively participating in design discussions for iterative enhancements and improved user experience

Software Engineering Intern - National Informatics Center, Pune, India — 2006

- Designed, developed and tested a corporate network security application with a firewall and optimized intranet bandwidth management system
